

# UK Foundation Programme 2026

## First preference ratios

The tables below show the first preference ratios for the last three years based on the number of places available in each foundation school and the number of applicants who preferred that foundation school first.

These figures are for the main foundation programme. They are taken from the number of Foundation Programme (FP) places at the time of the national allocation to foundation schools and the number of applicants remaining in the process at that point in time. FPP programmes, and the applicants who accepted FPP offers, are not included. Applicants who withdrew prior to allocation are also not included.

Ratios are shown both before and after completion of the pre-allocation scheme and manual matching (SFP pathway 1 and the ‘new medical school’ local allocation pilot in England).
